Executive Video Interactive Companion XVIC Solutions

Ease of Use

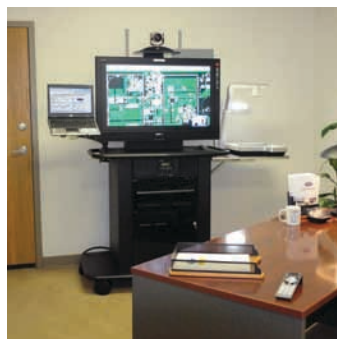

- Simply flip the switch on the power system and you are ready to go.
- If you already utilize a Polycom, Tandberg or LifeSize system the operation is essentially identical!
- XVIC II wireless (802.11b/g) supports Standard Definition (SD) and High Definition (HD) for the best video quality possible.
- XVIC II can be operational in 5 minutes or less with one access point (AP) and cover a 40,000 Sq/Ft facility! Adding more AP's easily extends the range.
- The XVIC II with its small footprint, low center of gravity and 4 large wheels enables ease of movement with minimal space requirements.
- The optional self-contained rechargeable battery power system provides power for 2-3 hours of use. XVIC II can be recharged from a standard AC outlet or for long term use or plugged into a standard AC outlet. Great for higher education, K12 schools, museums, court rooms where power and network cables are not permitted.
- XVIC has solved the age old problem with K12 teachers wanting to teach in their class room and not the "Distance Education Room". The XVIC can roam to any class room in minutes.
- The XVIC II High Definition document camera and laptop PC are retractable to allow for extremely easy movement.
- XVIC does not require extensive wiring to cover a large facility
- You can now take your customer from another state or country on a live video tour of your facility to show your new products or services, provide them with virtual on the job training or meet the engineering group or C.E.O. Let your imagination be your guide!

Usage Environments

- International Meetings
- Board of Directors
- Market Research
- Collaborative Conferences
- Telemedicine
- Distance Education
- Manufacturing
- Research and Development
- Zoo and Aquarium
- Law Enforcement
- Judicial Collaboration
- Convention Centers
- Surgical Suites
- Construction Management

ExStream Mobile Technologies prides itself on designing the most reliable wireless video conferencing systems.

Extend your videoconferencing capabilities to any room in your facility in less than 10 minutes, today.

Since its inception, video conferencing has traditionally been conducted in the designated "Video Conferencing Room".

You are forced to conduct meetings based upon the constraints of this space and network wiring.

ExStream Mobile Technologies changed that with the XVIC II system!

The Executive Video Interactive Companion (XVIC II)

is a wireless (802.11 b/g) enabled, mobile, self-contained, H.323 IP/ H.320 ISDN videoconferencing system that provides high quality, group room video conferencing any where any time!

XVIC II sets the benchmark standard for wireless (802.11 b/g) , group video communication systems. XVIC is integrated with a unique 32" Tall Steel cart, a 40" LCD video monitor and the industry standard codec's from Polycom, TANDBERG or LifeSize for the highest video and audio quality.

Executive Video Interactive Companion ...

Extends your video conference wirelessly!

The XVIC II system can be configured with the following codecs

Polycom : VSX 7000, HDX 900x

Tandberg: 770, 880,990, EDGE, C20

LifeSize : All Codecs

XVIC II can be shared between multiple departments, floors, and work groups within a facility for the greatest return on your investment.

ExStream Mobile Technologies designed XVIC II with unparalleled wireless video range and performance.

XVIC II provides roaming capabilities from the most remote area of your facility with additional 802.11b/g WiFi access points.

XVIC II can be integrated with your existing wireless network (802.11b/g) or can be overlaid on your existing wired network. XVIC provides the ability to communicate and execute the organization's vision wherever and whenever needed.

This is the next Generation of IP Videoconferencing!

Since the XVIC II system is wireless, there's no need to wire 15 rooms and employ an engineer to manage the IP or ISDN connections. Simply roll the system into the room, turn on the power switch and it's ready to use! No complicated menus, No advance room scheduling required, No addressing issues, No technical personal required, and No new interface to learn. If you're familiar with Polycom, TANDBERG, or LifeSize products, you're familiar with XVIC II.

Specifications

Construction

- The XVIC is portable, very stable, and easily maneuvered by one person
- 32" High cart for optimal face-to-face communications
- Generous internal storage, 19" Rack mount, 2 adjustable interior shelves
- 100% All steel construction
- 4 Large, 4 inch casters

Electrical

- Operate on 110Vac/ 220Vac 50/60 Hz for domestic or international operation.

Electronics

- 802.11b/g RF diversity system with high gain omni directional antennas for 360 degree coverage
- Choice of Polycom, TANDBERG, or LifeSize Video Codecs
- 40" LCD HD Display for a group room setting with superior picture quality

XVIC II Options

Optional XVIC II accessories include:

- Integrated VCR/DVD,
- Integrated AC or DC battery powered power system with automatic charger, two sealed leek proof batteries and automatic power transfer switch from AC to DC and reverse.
- Audio power amplifier with dual high performance speakers and subwoofer,
- Retractable HD document camera,
- Wireless UHF head set and belt pack systems for noisy environments
- Second pan/tilt/zoom camera,
- 8-16 Wireless table top microphones,
- Retractable wired or wireless laptop
- Bridging Capabilities, ISDN Support, AES, DES, and H.264, etc.
